FEDERAÇÃO PORTUGUESA DE GOLFE

To All Clubs

Lisbon, 26 of May 2008

CIRCULAR Nr. 09/08

WORK PROGRAMS OF THE PORTUGUESE GOLF FEDERATION

The Portuguese Golf Federation began a new stage in 2003, concerning the development of the golf activity process as a High Performance sport activity.

Any sport, which is practiced at the highest level, requires numerous efforts in order to achieve the proposed objectives. Those efforts are not only required to the players, but also to the Federation itself, to coaches and other technicians involved.

The Technical Committee of the Portuguese Golf Federation considers of paramount importance that the athletes, which are integrated in the work programs, are duly prepared for the demands of the High Level golf. For this reason, the Federation recently hired two technical assistants, which will be responsible for the coordination of two areas which are vital for the qualitative development of the National Teams: psychological and physical.

Therefore, **we request the collaboration and interest from all Clubs, which have athletes integrated in the work programs of the Portuguese Golf Federation, to make these athletes aware of the importance of complying with those programs – technical, physical and psychological. We believe that this is the only way to reach the results that we all intend to achieve, as well as to complete the database of players which can become part of the several National Teams.**

Please note that, not complying with the work programs definitely excludes players from being called to integrate the National Team.

Best regards,

Portuguese Golf Federation

Pedro Vicente
General Secretary

Miguel Franco de Sousa
Assistant Director
