myFPG Scorecards for Handicap

Technological innovations relating to scorecards registrations

The feature myFPG Scorecards can be used for submitting individual scores for handicapping purposes. Find out how.

myFPG Scorecards – What are the specifications for scores for handicapping?

- The feature Scorecards, within myFPG, can be also be used for submitting scores for handicapping purposes.

- The player must check with his Home Club about any specific conditions, applicable within the scope of the internal bylaws and procedures of each club. For example, regulations referring to the submission and timing procedures for scores approval.

- The submission of scores for handicap purposes (EDS), by the player, is subject to the requirements of the Handicap System in force:
    1. Pre-registration (registration of the scorecard in myFPG includes date/time)
    2. Marker (is identified in myFPG)
    3. Played in accordance with the Golf of Rules
    4. Played in "handicap conditions", regarding rated courses and playing formats

- The integration of the score for handicapping (EDS) is subject to:
    1. Approval of the submitted score by the Handicap Committee of the Player's Home Club;
    2. Conditions and calculations of the Handicap System

Can the player continue to submit "EDS" using the previous method?

- Yes, if the Home Club allows it, within the scope of its' Internal Regulations.
- Both methods for submitting scores played outside tournaments for handicapping – through myFPG, or the previous method (through pre-registration in the golf course and submission of the scorecard in the home club) – comply with the requirements of the Handicap System in force.
